

Caggiano (Sa,Italy) 2025

To the kind attention of the Human Resources Department,

I would like to submit my application and briefly introduce myself, highlighting my background and the value I can bring to your organization.

I hold a degree in **Management Engineering** from the University of Parma and have been working in the industry since July 2018. My professional journey began as an **ERP Business Consultant**, with a strong focus on **production processes**. This role gave me the opportunity to work with major industrial companies, managing complex challenges related to production flow, material requirements planning (MRP), job order management, and MES systems implementation, especially within the framework of **Industry 4.0**. Over the years, I have been involved in every phase of ERP projects — from **requirements analysis** to **system configuration, customization, user training, and post-go-live support**. I have developed solid technical skills in **SQL, Crystal Reports, Python**, and the **Microsoft Office suite**, which I use for data analysis and reporting.

Currently, I serve as a **Project Manager** at a manufacturing company, where I oversee IT-related projects, analyze and optimize production processes, manage investment plans under the Italian Transition 4.0 program, and lead continuous improvement initiatives. Through this experience, I have also become confident in using **Agile methodologies** for project management and strengthened my profile as a **Functional Analyst**. I am a team-oriented individual who adapts easily to different environments and challenges. I enjoy problem-solving, tackling complex situations, and delivering efficient, practical solutions. I am curious, enthusiastic, and driven by a strong sense of responsibility and a continuous desire for professional growth.

Thank you for your time and consideration. I would be glad to further discuss how I can contribute to your team in an interview.

Kind regards,

Eng. Giuseppe Macrini

CURRICULUM VITAE DI MACRINI GIUSEPPE
